

**Notice of Motion**  
**(To Direct the Mayor to send a letter to Premier of Ontario and Minister of Environment and Climate Change on highlighted water sustainability issues and life cycle management of water bottles/cans)**

**RESOLUTION**

**Resolution #**  
**Moved By Councillor Matt Sammut**  
**Seconded By**

**Be it resolved that Council** has significant concerns on ground water management and related policies, together with enhancing future protection of these assets; with the review of this necessary and valued Canadian asset ensure that policies protect it for future generations.

The Town of Erin would also like to bring forward their deep concern on the full life-cycle management of materials (plastic bottles/cans), including the implementation and administration of the Waste Free Ontario Act which clearly outlines the responsibilities of producers to manage waste (plastic bottles/cans) amongst other items.

That the Mayor (with assistance from staff) be directed to send a letter to both the Premier and the Minister of Environment and Climate Control outlining the concerns referenced above. A response from the Premier and Minister should be requested outlining the long-term plan of the Province to effectively address these issues into the future.

That this letter be sent to all other Ontario municipalities.

**Matt Sammut**  
**Councillor**  
**Corporation of the Town of Erin**
